Game Development Javascript

Abhishek Deora

What is P5JS

Introduction

p5.js is a JavaScript library that starts with the original goal of Processing, to make coding accessible for artists, designers, educators, and beginners, and reinterprets this for today's web.

```html
<script src="../p5.min.js"></script>
```

My first project

Instead of learning the syntax here, let us make your very first game in javascript using p5js.

In the end of the talk, I will be showing you some of the games which i built in 15-20 minutes.

This game will be very simple. You must have played the game in which the objective is to make the egg land in the bucket.

So let us see whether P5JS is really that simple and powerful

Easy right

Now i hope you understand how powerful this js library is and how easily you can make all those mini games which you used to play as kids eg: snake game, bounce, flappy bird, sky war and many more.

Egg and Bucket

Examples

Now let me show you a few examples.

[Flappy Bird](#)
[Sky wars](#)
[Nqueen](#)
[Asmita triathlon](#)

Thank You
